April 2023 Special FSP Edition

Family Support Project

The Family Support Project (FSP) was started in 2006 to support 20 of the very poorest families in the community. They are given £10 a month, with the understanding that if they receive this they will keep their children in school until 10th Class, instead of sending them out to work. Many of these children have gone onto further education. We have very little regular support for these families and rely on our fundraising efforts to raise the money. This is a special request for sponsors. We would be grateful for any regular amount you can spare to keep this project going. Please advertise the need for us where you can. Three of the families tell their stories here. Please help them if you can.

Umachandra's story

I am writing to thank my Dear helpers.

My name is Umachandra. I was born by birth polio so I married a Polio person named Roja Ramani. Economically we faced many problems we cannot go to work regularly as both of our legs are not working properly. I can go to work 3 days in a week my wife cannot go any outside work but she can do housing work she can cook and clean in house. When Clifford and Pat Smith came to India in 2016 they saw our circumstances and enrolled us in the Family Support Project at a time when our two daughters were finding it very difficult to send them to school regularly. Since then we have been receiving support from you every month because of that support our two children are able to go to school without stopping. The elder daughter's name is Jayasri studying in 6th standard and the younger daughter's name is Himabindu studying in 4th standard. The help you send is very helpful to us, sometimes your help is very helpful in buying goods in our house. We have also got our name in the YSR Housing Scheme on behalf of the state Government. To build that house, the government will provide 1.8 lakhs of materials in three installments, but the money they give is not enough to build it for one year and we also have to pay some money for this construction because the amount they sanction us for the house is not enough. Anyway, in a few months we will soon have our dream of owning our own house. Before ending my words, I once again pay my full regards to you for your great support to our poor family.

Thanking you,
Yours faithfully,

Umachandra & family.

Lijamma and Mohan Rao's stories

I am writing to thank my dear helpers. My name is Mohan Rao and I am getting FSP support since 2006. I have a son and three daughters. I used to work as a lorry driver, when I broke my legs in lorry accident doctors operated on my legs with iron rods. Now I am going to small work for small salary but it is no sufficient for my family feeding. I am very happy to say that God is giving us help through SalGO Assist UK and helping them to continue their education with your great help our four children are able to study well. The first daughter Hepsi was able to settle down in life as a nurse only because of your educational support, while the second daughter named Blessy also completed her lab technician course and married a man named John and settled down in life. Esther is in tenth standard and Samson is in eighth standard. All of them are able to continue their studies and settle down because of your great support, so we are very grateful to you for the help you have been giving us for so many years. I am also sending the picture of my second daughter's wedding for your blessing. Please pray for us and for our children's education. Thank you, Mohan Rao

My name Lijamma, by birth I am a mild mentally illness person with the suggestions of our grandparents, my parents do my marriage with Nallaiah. After born two children he sent me out to our parents' home they also refused me to stay there that is why I have taken a rented house with two rooms and I started to go wash cloths and clean the house in one rich man's house. My income is not sufficient for me to send our children to school daily that is why they dropped their education 8th and 7th standard! In that situation Pastor Gamaliel wrote you about our condition to SalGO Assist to support my family with your kindness support I re-start to send our children to school from the month of September 2018, with the great support of SalGO Assist UK. If our children can continue their studies regularly that is only kindness, now my daughter is going to Intermediate 2nd year commerce and my son Samuyelu can join in ITI – Industrial training course. Through this letter I thank you for giving us the chance to continue our children's education which has stopped, we are getting two meals full of food because of you without your help we can only eat once with my earnings per day! Not only our families, total twenty families can take their daily food with your kind support because of your kind help we are able to eat food every day. Finally many thanks for all your monthly support for our FSP families. I am not that knowledgeable but please forgive me if there are any mistakes in this letter. Thank you Lijamma.
